

Introduction

BOILER pH BOOSTER is a specially formulated chemical designed to maintain the desired pH level in boiler feedwater and boiler-water systems. Proper pH control helps minimize acidic corrosion of boiler components, feedwater lines, condensate return systems and associated equipment.

The product is suitable for industrial steam boilers where controlled chemical dosing is required to maintain water chemistry and support reliable boiler operation.

Features

- Helps maintain optimum boiler-water pH
- Supports protection against acidic corrosion
- Helps protect boiler and feedwater system components
- Suitable for continuous or intermittent dosing
- Helps maintain stable boiler-water chemistry
- Supports improved equipment reliability
- Suitable for various industrial boiler systems
- Can be integrated with a complete boiler-water treatment program

Specification

Appearance	Clear to Pale Yellow Liquid
Physical Form	Liquid
Solubility	Completely Soluble in Water
Odour	Characteristic
Active Chemistry	Proprietary Alkalinity / pH-Control Formulation
Shelf Life	12 Months*
Packaging	25 L / 50 L / 200 L

PELICAN-PH BOOSTER

Boiler Chemical– PC CT PH

Recommended Dosage

The dosage depends on the degree of scaling, system volume, water chemistry, deposit composition and equipment metallurgy.

Packaging

Only 50,55,60 Kg Packaging available

Note: We make sure that our offered chemical is formulated in a hygienic environment.
