

Introduction

Cooling towers operate under demanding conditions where mineral deposits, corrosion, algae, and bacteria can significantly reduce system efficiency. PC CT ALG 306 prevents algae formation that can block water flow, reduce heat exchange efficiency, and increase maintenance requirements.

Highlights

- Complete Cooling Water Treatment Program
- Algae Prevention
- Restores Heat Transfer Efficiency
- Reduces Maintenance Costs & Extends Equipment Life
- Suitable for Open & Recirculating Cooling Systems

Application

- Industrial Cooling Towers
- HVAC Cooling Systems
- Power Plants
- Chemical Processing Industries
- Pharmaceutical Manufacturing
- Food & Beverage Processing
- Textile & Petrochemical Plants
- Commercial Chiller Systems
- Manufacturing Facilities

Storage

Storage This product should be stored in original containers in cool and dry place, away from sources of heat, flame and direct sunlight.

Packaging

Only 50,55,60 Kg Packaging available
